

IV. AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A gaming machine comprising:
game result display means for displaying a game result thereon; and
beneficial state generating means for generating a beneficial state for a player
when a predetermined game result is displayed on the game result display means;
wherein the game result display means includes first display means and
second display means arranged ~~at a more front side than~~ in front of a display area of
the first display means when seen from a front side of the gaming machine, and
~~wherein the second display means has light transmitting symbols capable of
displaying display contents of the first display means therethrough, and the light
transmitting symbols are variably displayed on the second display means~~
wherein the second display means conducts a demonstration display in which
a background thereof is displayed in a dark color so that the game result on the first
display means is difficult to be seen and light transmitting symbols are variably
displayed in the background, after the game result is displayed on the first display
means, and
wherein a part of the game result on the first display means is seen only
through the light transmitting symbols while being variably displayed on the second
display means.

2. (Original) The gaming machine according to claim 1, wherein the light transmitting symbols have specific shapes.

3. (Original) The gaming machine according to claim 1, further comprising rear illumination means for illuminating the first display means from a rear side thereof.

4. (Currently Amended) The gaming machine according to claim 1, further comprising:

light transmitting mode memory means for storing a plurality of display modes
of images including the background and the light transmitting symbols; and

light transmitting mode select means for selecting one or a plurality of display modes among the display modes stored in the light transmitting mode memory means;

wherein the second display means displays ~~an image including the display area~~ the images based on a selected result by the light transmitting mode select means.

5. (Original) The gaming machine according to claim 1, wherein the first display means includes a plurality of symbol display parts capable of variably displaying one or a plurality of symbols and conducting stop display thereof, and wherein the light transmitting symbols correspond to areas which are driven so that the player sees and recognizes a part of the symbol display parts.

6. (New) A gaming machine comprising:
game result display means for displaying a game result thereon; and
beneficial state generating means for generating a beneficial state for a player when a predetermined game result is displayed on the game result display means;
wherein the game result display means includes first display means and second display means arranged in front of a display area of the first display means when seen from a front side of the gaming machine,
wherein the second display means conducts demonstration display in which a background thereof is displayed in dark color so that the game result on the first display means is not seen and light transmitting symbols are variably displayed in the background, after the game result is displayed on the first display means, and
wherein a part of the game result on the first display means is seen only through the light transmitting symbols while being variably displayed on the second display means.
